AMENDMENT TO THE CLAIMS

The following claim listing replaces all prior listings and versions of the claims:

LISTING OF CLAIMS

- 1-2. (Cancelled)
- 3. (Currently Amended) A nonaqueous electrolyte secondary battery comprising:
 a positive electrode having an active material of a complex oxide capable of storing and
 emitting lithium ions;
 - a negative electrode capable of storing and emitting lithium ions;
 - a separator disposed between the positive electrode and the negative electrode; and an electrolytic solution containing a nonaqueous solvent,

wherein discharge-end voltage of the nonaqueous electrolyte secondary battery is within 2.5V to 3.0V,

the positive electrode contains a positive electrode active material comprising a first active material of lithium-based complex oxide and a second active material of another lithium-based complex oxide having an average discharge voltage lower than an average discharge voltage of the first active material,

an added amount of the second active material is at least 5% and at most 20% in capacity of a total amount of capacity of the positive electrode active material, and

the first active material is a composite "A" expressed as Li_xMO_2 , "M" denoting a 3d transition metal, x being given as $0.9 \le x \le 0.98$, and the second active material is LiMnO₂ of which average discharge voltage is within 2V to 3V.

10/586,602

- 4. (Previously Presented) The nonaqueous electrolyte secondary battery according to claim 3, wherein the composite "A" contains at least one of materials expressed as $\text{Li}_x \text{Ni}_y \text{Mn}_z \text{Co}_{1-y-z} \text{O}_2$, x, y, and z being given as $0.9 \le x \le 0.98$, $0.3 \le y \le 0.4$, and $0.3 \le z \le 0.4$, and $\text{Li}_x \text{Ni}_y \text{Co}_z \text{Al}_{1-y-z} \text{O}_2$, x, y, and z being given as $0.9 \le x \le 0.98$, $0.55 \le y \le 0.8$, and $0.15 \le z \le 0.3$.
 - 5-8. (Cancelled)
